# ABOUT THIS JOURNAL

## WELCOME TO THE 4TH EDITION OF THE *BIRDER'S LIFE LIST AND JOURNAL*

This new edition includes all species known to occur in the United States and Canada, including those that regularly appear in Hawaii.

The *Birder's Life List and Journal* is based on the eBird taxonomy v2018 current with Clements v2018 (released 14 August 2018), which is itself current with the 59th supplement to the American Ornithological Society's Checklist of North American Birds (July 2018). Both common and scientific names are provided within the list. Please keep in mind that due to changes in nomenclature, the names of some species will not be the same as those listed in older field guides.

### QUICK SEARCH GUIDE

To quickly find the pages where a group of birds is listed, align the colored bars on this page to the matching tabs in the list.

### SPECIES LISTINGS

The species lists have space for writing brief notes for each bird. You can use this space for listing subspecies, or for brief remarks on behavior, habitat, and time of day. All of the species are listed in taxonomic order, the same order used in most field guides. Introduced birds are indicated by (I) following the common name.

**North American Species:** This list consists of 767 native and introduced bird species found regularly in North America north of Mexico.

**Hawaiian Species:** Here we list 64 native and introduced birds found on the Hawaiian Islands. These species are Hawaiian birds occurring

## ABOUT THIS JOURNAL

naturally in Hawaii that are not already listed in our North American Species list. Therefore, some birds seen in Hawaii appear only in the North American Species list, so be sure to check there if you cannot find the bird you are looking for in Hawaii.

**Accidental Species:** These species appear very rarely in the United States and Canada but have been officially accepted by the Committee on Classification and Nomenclature of the American Ornithologists' Union. Note that lists of accidentals appear at the end of the North American and Hawaiian species lists, respectively.

**Extinct Species:** Here we provide a list of birds in the United States and Canada that are known to be extinct or that may be extinct.

### CHECKLIST

This is a complete list of all the birds of the United States and Canada. Introduced, Hawaiian, and accidental species are indicated by (I), (H), and (A), respectively.

### BIRD NOTES

Here is a set of blank entries with additional space for recording your more memorable bird moments or for sketching birds.

### INDEX

All the species included in this book are listed here in alphabetical order.
