Preface	xi
Introduction	1
Part I: Hardware	7
1. What Is a Computer?	11
1.1 Logical Construction	13
1.1.1 Processor	14
1.1.2 Primary memory	15
1.1.3 Secondary storage	16
1.1.4 Et cetera	18
1.2 Physical Construction	18
1.3 Moore's Law	22
1.4 Summary	23
2. Bits, Bytes, and Representation of Information	25
2.1 Analog versus Digital	25
2.2 Analog-Digital Conversion	27
2.2.1 Digitizing images	27
2.2.2 Digitizing sound	28
2.2.3 Digitizing movies	31
2.2.4 Digitizing text	31
2.3 Bits, Bytes, and Binary	32
2.3.1 Bits	33
2.3.2 Powers of two and powers of ten	34
2.3.3 Binary numbers	35
2.3.4 Bytes	36
2.4 Summary	38
3. Inside the Processor	39
3.1 The Toy Computer	40
3.1.1 The first Toy program	40
3.1.2 The second Toy program	42

3.1.3 Branch instructions	43
3.1.4 Representation in memory	45
3.2 Real Processors	46
3.3 Caching	48
3.4 Other Kinds of Computers	49
3.5 Summary	51
Wrap-up on Hardware	53
Part II: Software	55
4. Algorithms	59
4.1 Linear Algorithms	60
4.2 Binary Search	62
4.3 Sorting	63
4.4 Hard Problems and Complexity	67
4.5 Summary	70
5. Programming and Programming Languages	73
5.1 Assembly Language	74
5.2 High-Level Languages	75
5.3 Software Development	81
5.3.1 Libraries, interfaces, and development kits	82
5.3.2 Bugs	84
5.4 Intellectual Property	86
5.4.1 Trade secret	86
5.4.2 Trademark	87
5.4.3 Copyright	87
5.4.4 Patent	88
5.4.5 Licenses	89
5.5 Standards	91
5.6 Open Source Software	92
5.7 Summary	93
6. Software Systems	95
6.1 Operating Systems	96
6.2 How an Operating System Works	101
6.2.1 System calls	102
6.2.2 Device drivers	103
6.3 Other Operating Systems	103
6.4 File Systems	104
6.4.1 Secondary storage file systems	106
6.4.2 Removing files	108
6.4.3 Other file systems	109
6.5 Applications	110
6.6 Layers of Software	112
6.7 Summary	114
7. Learning to Program	115
7.1 Programming Language Concepts	116
7.2 A First JavaScript Program	117
7.3 A Second JavaScript Program	119
7.4 Loops and Conditionals	120

7.5	JavaScript Libraries and Interfaces	122
7.6	How JavaScript Works	124
7.7	A First Python Program	124
7.8	A Second Python Program	126
7.9	Python Libraries and Interfaces	127
7.10	How Python Works	130
7.11	Summary	130
Wrap-up on Software		133
Part III: Communications		135
8. Networks		141
8.1	Telephones and Modems	142
8.2	Cable and DSL	142
8.3	Local Area Networks and Ethernet	144
8.4	Wireless	146
8.5	Cell Phones	148
8.6	Bandwidth	151
8.7	Compression	152
8.8	Error Detection and Correction	154
8.9	Summary	155
9. The Internet		157
9.1	An Internet Overview	158
9.2	Domain Names and Addresses	161
9.2.1	Domain Name System	161
9.2.2	IP addresses	162
9.2.3	Root servers	163
9.2.4	Registering your own domain	164
9.3	Routing	164
9.4	TCP/IP Protocols	166
9.4.1	IP, the Internet Protocol	168
9.4.2	TCP, the Transmission Control Protocol	169
9.5	Higher-Level Protocols	170
9.5.1	Telnet and SSH: remote login	170
9.5.2	SMTP: Simple Mail Transfer Protocol	172
9.5.3	File sharing and peer-to-peer protocols	173
9.6	Copyright on the Internet	174
9.7	The Internet of Things	176
9.8	Summary	177
10. The World Wide Web		181
10.1	How the Web Works	182
10.2	HTML	183
10.3	Cookies	185
10.4	Active Content in Web Pages	187
10.5	Active Content Elsewhere	188
10.6	Viruses, Worms and Trojan Horses	189
10.7	Web Security	191
10.7.1	Attacks on clients	191
10.7.2	Attacks on servers	196

10.7.3 Attacks on information in transit	197
10.8 Defending Yourself	198
10.9 Summary	201
Part IV: Data	203
11. Data and Information	205
11.1 Search	206
11.2 Tracking	209
11.3 Social Networks	216
11.4 Data Mining and Aggregation	219
11.5 Cloud Computing	221
11.6 Summary	225
12. Artificial Intelligence and Machine Learning	227
12.1 Historical Background	228
12.2 Classical Machine Learning	229
12.3 Neural Networks and Deep Learning	232
12.4 Natural Language Processing	234
12.5 Summary	237
13. Privacy and Security	239
13.1 Cryptography	240
13.1.1 Secret-key cryptography	242
13.1.2 Public-key cryptography	243
13.2 Anonymity	247
13.2.1 Tor and the Tor Browser	247
13.2.2 Bitcoin	250
13.3 Summary	252
14. What Comes Next?	255
Notes	261
Glossary	269
Index	277
